

SURVEY:

**Consumers are aware of toxic chemicals
in vaping yet 91% claim they can't quit**

Growing Fear Vaping is Addictive,
Dangerous Alternative to Cigarettes

A recent poll of 1,000 U.S.-based consumers, consisting of those who vape and do not vape, found that nearly three-quarters of those surveyed (73 percent) see vaping as an addictive, dangerous alternative to cigarettes.

"The survey results confirmed our suspicions that many consumers are aware of the detrimental impacts of vaping but feel trapped in their addiction and are seeking help."

Ike Sutton, founder & CEO of VapeAway

58%
believe cessation
technology would
help wean off nicotine
and potentially
quit altogether

86%
of vapers polled
revealed they
have thought
about quitting

23%
of vapers believe
they can quit in
the new year

73%

of respondents
would spend \$100
to help someone
quit vaping

42%

believe community
support would
help someone quit

83%

of respondents
believe vaping is
as addictive as
cigarettes

91%

of respondents who vape shared
they have attempted to quit and
failed multiple times

Nearly half
of all respondents
believe **cigarette use**
is more dangerous
than vaping.

*"The new survey results show e-cigarettes are harder to quit than combustible cigarettes, and data shows that **withdrawal from e-cigarettes is as severe as traditional cigarettes**"*

*"Not only does vaping
impact the individual,
but also **loved ones**
who surround them."*

More than
2 MILLION U.S. middle
and high school
students reported
use of e-cigarettes

In early 2022,
VapeAway will begin distribution of their **VapeAway Filters** and **VapeAway System**. This first-ever patented device and accompanying support system are designed to reduce the harmful chemical impacts of vaping by utilizing a revolutionary filter that minimizes addiction to nicotine without administering a drug.
